First Heading

Second Heading

Third Heading

This is some content that contains inline italics, **bold**, and code fn().

But mdpdf also supports strikethrough.

You can organise your projects with todolists (broken ATM):

- But
- This
- Is
- not
- the

Or take notes with unordered or ordered lists:

- notes
- are
- mandatory
- 1. order
- 2. is
- 3. absolute

	Tables	are	supported	too
I	n	addition	too	'smart punctuation'

```
def function():
    return "Hello World!"

# and syntax highlighted code blocks

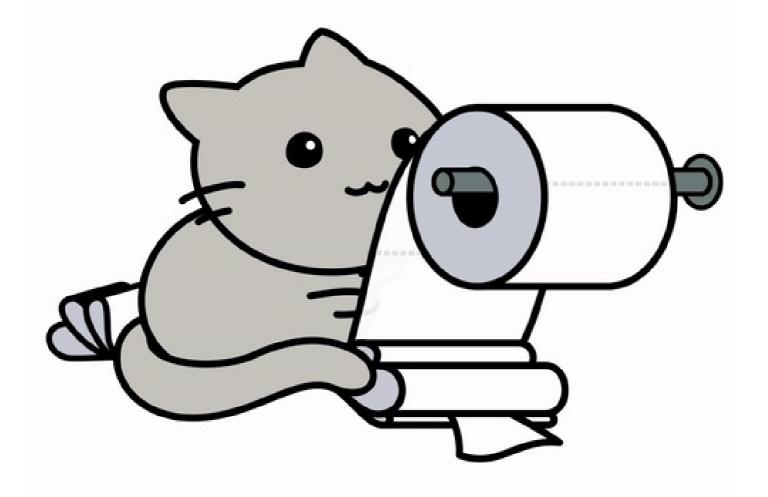

if __name__ == "__main__":
    print("That features extensive support")
```

```
There's also blockquotes

That even support

Nesting
```

Breaking with <div class="break"></div>:
